

Accelerating transformation for clients in regulated industries

Nov 10, 2021

#IamIBMEExpert

A perspective by **Raghavendra B Jayashankar**, Client Relationship Manager - Global System Integrators, IBM India/South Asia.

[Infosys](#) and IBM have been strategic partners for over last two decades with synergies across IBM Cloud & Cloud paks, Systems, Information Security, Application development and more. Over the years, Infosys has developed core competencies across various IBM Hybrid Cloud, AI and Security offerings including IBM BPM, IBM Watson Applications including Maximo and TRIRIGA.

Leveraging these capabilities, Infosys is helping address several industry challenges. For example for the Retail industry, Infosys has developed EPOCH omnichannel solution using IBM Sterling order management software (OMS) to deliver a superior customer experience by improving Omni-Channel capabilities. Over the years our partnership is aimed at delivering successful outcomes for customers. For example, by leveraging [Infosys Cobalt](#) along with IBM's deep technical capabilities we have helped clients accelerate their cloud journey. Infosys is the first global systems integrator to join IBM's Hybrid Cloud ecosystem to help enterprises including those in highly regulated industries such as financial services, insurance and healthcare - to transition, modernize and transform their enterprise workloads and applications.

With [Infosys Finacle](#) we are helping banks across the globe accelerate their digital transformations. The partnership enables us to jointly develop contemporary solutions and support large banking transformation programs. Many Finacle clients have also traditionally used Finacle solutions on IBM infrastructure. More recently, the partnership focus has been on leveraging IBM Cloud Pak and RedHat Open shift container to provide business agility, resilience, and cost savings for banks of all segments.

We would like to thank Infosys team for their support and look forward to further strengthening our partnership to help clients emerge as winners in the Hybrid Cloud era.
